- ✓ The soft material cares for and protects delicate and sensitive skin
- ✓ Extra high absorbency and good strength when wet
- ✓ Practical and hygienic solution
- ✓ Suitable for full-body washing
- ✓ Ideal for washing without water

Product Description

ABENA's Wash Glove for personal hygiene is made of strong material and designed for single-use. The glove's embossed surface makes it easy to remove impurities and bacteria from the skin. The glove is intended for a full cleansing, and its soft and comfortable material makes it particularly suitable for washing exposed areas and delicate skin. The glove is strong and absorbent, even when wet. The practical opening in the wash glove makes it easy to put on. We also recommend using an ABENA nitrile glove under the wash glove for extra protection against bacteria and viruses. Our wash glove is practical and hygienic. And it is easy to use in a wide range of situations; i.e. patient care, private chores or on a camping holiday, when there are limited opportunities for a proper bath.

Instructions for use/application

First, moisten the glove with water if you use a product from our blue range (wash with water). You can also use the glove without water, together with a product from our green range. The glove can be turned over with a slight movement, without you having to touch the unclean side. This makes

the wash glove extremely hygienic. After use, remove the wash glove inside out and dispose of it together with normal household waste. For external use only.
